IT Support, Managed Services & Digital Infrastructure Proposal

for Headway Essex

A proactive IT partner committed to your mission

Executive Summary

We understand that for Headway Essex, IT is not just infrastructure — it is critical to delivering life-changing support to vulnerable individuals across two sites in Colchester and Benfleet.

This proposal sets out how Sweetbyte will deliver responsive helpdesk support, proactive monitoring, scheduled onsite engagement, and a structured path from on-premise infrastructure to a cloud-based operating model. Our priority is stability for your 26-user environment without commercial lock-in.

What differentiates our service is the operating model behind it — direct access to engineers, performance-based contract terms, and a strong local presence. For a charity environment, this reduces commercial risk while increasing confidence that service quality must remain consistently high.

sweetbyte

Try Us Before You Buy Us:
Experience our service risk-free.

25+

Years Experience:
Established expertise you can trust.

Local Support:
Fast, friendly, and just round the corner.

Understanding Your Requirements

Headway Essex requires a managed IT partner capable of supporting approximately 26 users across two operating sites — Colchester and Benfleet — together with an on-premise server, Microsoft 365 environment, VPN-connected remote access, and an externally hosted WordPress website.

The tender makes clear that the successful supplier must provide more than a helpdesk. The requirement is for a partner that can combine day-to-day support with medium-term planning and practical transformation capability — particularly the planned migration from on-premise to cloud-based operation.

What Our Clients Say

Success Stories from Local Businesses

Seamless transition... Sweetbyte's team made our office move stress-free.
